Dear <names of all authors of the paper>,

My name is XXX, and I am a graduate student working with Prof. Julia Rubin at the University of British Columbia, Canada (<https://people.ece.ubc.ca/mjulia/ReSeSS.html>). I recently read your paper "TITLE" and found it very interesting! I was wondering if the implementation of your tool is available and, if so, would you be able to share it with me? I would appreciate that very much!

Thank you in advance and I am looking forward to hearing back from you,

Regards,
